

Crown Headlocks

PSS-001-Crown_Headlock-01

DESIGNED FOR COMFORT AND LABOR EFFICIENCY

Headlocks were designed to give farmers the ability to restrain multiple animals at one time, streamlining labor efficiency and making physical examinations, vaccinations, artificial inseminations, pregnancy checks and routine treatments faster and safer.

BENEFITS

- Headlocks allow just a few people to lock up and treat a number of animals at one time and eliminates time consuming chasing. This drastically reduces the labor needed to treat the animals
- Headlocks create a safer, less stressful working environment for animals and staff
- Our Standard Self Locks are hot dip galvanized after welding, which ensures exceptional corrosion resistance. These headlocks have 2-3 times the zinc spray coating found on welded headlocks

FEATURES

- Easy installation
- Pivot swing arm for extended life span
- Headlock options for calves, heifers, and cows
- Exceptional corrosion-resistance and strength
- Hot dip galvanized after welding for increased durability
- Features a self-opening top and a bottom blocker to prevent cows from entering the wrong way

OPTIONS

- Spring loaded and welded style headlock handles
- Regular and adjustable headlock handles
- Variety of brackets and clamps

Part #	Type	GAL	Length		Gauge	Weight		Pipe Thickness		# of Openings
