

## Raised Calf Zones

PSS-008-Raised\_Calf\_Zone-01

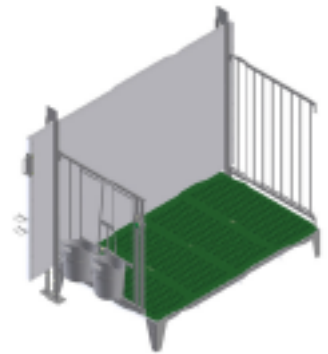

**These freestanding Raised Calf Zone pens** feature a slatted floor that was developed for use with flush systems. They feature the VES-Artex green slatted floor, which has holes large enough to allow waste to pass through and were designed to prevent damage to the calves' hooves.

Now available in two sizes, our systems feature two separate front gate openings that help prevent contamination between buckets.

The VES-Artex Raised Calf Zone System features a steel plate base with a steel lip that safely secures the floor panels in place and makes installation and cleaning easy.

0.8M (30") X 1.6M (63")  
with 5L Buckets

1M (40") X 1.6M (63")  
with 10L Buckets

### BENEFITS

- Bucket holder base that prevents animals from pushing buckets through holder
- Spring-loaded bucket hold down mechanism that stops calves from tipping buckets and contents
- Two opening gates that prevent cross-contamination between feed and water

### FEATURES

- Designed for use with flush systems
- Holes large enough to allow for good drainage

### OPTIONS

- Two Raised Calf Zone widths
- 2L or 6L bottle holder
- Single or double-sided hay feeder
- 5L or 10L no-stick stackable buckets
- Single opening back panel option for use with robot feeders
