

## Sloped Feed Rails & V-Trainers

PSS-010-Sloped Feed Rail-01

**Sloped Feed Rails and V-Trainers** are a great feed rail alternative for young animals. With a mixture of ages and sizes in a pen, these feed fronts not only teach animals how to put their head through a small space and keeps them in the pen and stops older animals from bullying the younger ones at the feed front.

By using V-Trainers or Sloped Feed Rails as a training tool before transitioning to headlocks, you ensure a smooth transition and fewer refusals.

### SLOPED FEED RAIL OPTIONS

- 7' 11" (2.41m) -6 openings
- 7' 11" (2.41m) -7 openings
- 7' 11" (2.41m) -8 openings
- 7' 11" (2.41m) -9 openings
- 9' 1-15/16" (2.97m) -12 openings
- 9' 11" (3.01m) -7 openings
- 9' 11" (3.02m) -8 openings
- 9' 11" (3.02m) -9 openings
- 9' 11" (3.02m) -10 openings
- 9' 11" (3.02m) -12 openings
- 11' 11" (3.36m) -10 openings
- 11' 11" (3.36m) -12 openings
- 11' 11" (3.36m) -14 openings
