

Lighting

EcoBay

An economical high bay light

Illuminate any barn to encourage safety and milk production with EcoBay lights from VES-Artex. These lights are safe for the herd and staff because they do not contain any glass or exposed screws which prevents anything from ever falling into the pens. EcoBay lights have a large surface area for heat dissipation and their good thermal conductivity ensures their high efficiency and reliability. They are rated IP66 making them 'dust tight'. These lights are affordable to purchase and to operate, especially as they can connect to an overarching control system to automate their usage.

EcoBay lights have a mounting option for every facility as they have attached hooks and can be hard-wired into the barn's electrical plan.

- ✓ Color Temperature: 5000K
- ✓ Dimmable
- ✓ Installation Method: Safety Hook and cable

IP66 and IK10 ratings ensure each unit's durability. The built-in waterproof respirator removes fog and condensation.

Encourage cow comfort, health, and milk production with a properly lighted barn.

Connect multiple units to an overarching control system for custom illumination.

Item Number	Fixture Watts	Voltage
105537	150 W	120-277 V
105538	150 W	277 - 480 V
105539	200 W	120 - 277 V
103859	200 W	277 - 480 V
