

## Head Catch System

PSS-021-Head\_Catch-01

The **VES-Artex Head Catch system** is designed to be used in a variety of applications from artificial inseminations, pregnancy checks, calving, and more. This head catch system has an easily adjustable neck spacing with quick pins that allow you to lock up mature Holstein and Jersey cows.

The VES-Artex Head Catch features hot dip galvanized components and heavy-duty construction, making them the right choice for anyone seeking a long-lasting and durable head catch system.

### FEATURES

- Adjustable neck spacing with quick pins for mature Holsteins and Jerseys
- Gate release levers on both left and right sides
- All components are hot dip galvanized
- Designed to be installed on a curb
