

## HANDS-OFF VARIABLE SPEED CONTROL

The SSV-DC automatically controls the speed of your fans based on the temperature in your facility. This single stage variable control is designed to control the speed of up to 10 fans within 500' of the controller.

Variable speed control allows you to run fans at any speed increasing energy savings, while reducing noise and ensuring that your animals are healthy and comfortable.

### BENEFITS

- Automatically adjusts fan speed from high to low based on the temperature (ranging from -13°F to 125°F) within your facility
- Features two LED displays that show the temperature, signal output, alarm codes, and programming information
- Programming lights that indicate which setting you are editing
- Comes standard with 6' temperature probe that can be extended up to 500'

### FEATURES

- Variable 0 to 10V output
- Start/Stop relay
- Error code display
- External alarm relay
- NEMA 4X enclosure and CSA approved
- Three-second full-power-turn-on to minimize fan ice-up
- Power-failure protection - no lost settings
- Three-character LED display with status & programming LEDs

PART NUMBER - 105419

### OPTIONS

- Probes are available in 30', or 150' cable lengths
- Designed for use with all VES-Artex circulation and exhaust fans using any wired VES-Artex VFDs

### WARRANTY

- 2-year warranty
