

AN ALL-PURPOSE MULTI-USE CONTROL

The SUPRA TOUCH controls the speed of your fans based on the temperature in your facility. This sixteen-stage control can vary the speed of up to forty fans and operate many more in on/off mode.

Monitor and control the temperature in up to four zones in your facility and run a variety of ventilation equipment.

BENEFITS

- Automatically adjusts fan speed from high to low based on the temperature (ranging from 14° to 110°F) within your facility
- Other conditions such as humidity, ammonia, and carbon dioxide can be monitored and use to influence the control of equipment.
- Data logging of temperatures, alarms, relay "on" durations, and setting changes
- Power-failure settings protection, including internal 24-hour clock
- Comes standard with a 30' temperature probe

PART NUMBER - 116884

Listings and Certifications

FEATURES

- 5-inch touch screen
- Easy to configure, program, and check status of equipment
- Four variable stages with overload protection fuses
- Twelve pluggable general-purpose relays
- Four 0-10VDC analog outputs,
- One alarm relay
- Four-zone temperature monitoring and control
- Adjustable temperature set points, range: 14 to 110°F (-10 to 43°C)
- Three-second full-power-turn-on for minimizing ice-up
- Rugged, fire retardant, corrosion & water-resistant NEMA 4X enclosure

OPTIONS

- Probes are available in 30', and 150' cable lengths
- Expansion kits are available
- Designed for use with all VES-Artex fans using any VES-Artex VFDs

WARRANTY

- 2-year warranty
