

## Freestall Systems

PSS-040-Freestall\_Systems-01

### Designed for Easy Installation and Maximum Cow Comfort

Research shows that the more a cow lays down, the more milk she produces. The VES-Artex Freestall system encourages your cows to lay down more often and for longer.

We provide you with a cost-effective, easy-to-install system that is designed stronger and will last longer than other systems on the market.

#### BENEFITS

- Provides cows with a comfortable resting space that keeps them properly indexed, keeping stalls cleaner and lowering health issues
- Hot dip galvanized components make your freestall system corrosion-resistant and long-lasting
- An open front design makes these freestalls more inviting and easier for cows to get in and out of

#### OPTIONS

- Wide variety of loop styles and sizes to choose from
- Choose between head-to-head or single row systems
- Three different stall mounting style options to choose from
- Specialized stalls, up-posts, and clamps are available upon request
- Available in our standard 11GA or 10GA upon request

#### FEATURES

- Versatile clamp system for easy installation and adjustability
- Hot dip galvanized heavy-gauge pipe and clamps for maximum strength and corrosion-resistance
- All welded products are hot dip galvanized after welding
- Heavy-duty tee and cross clamps have locking holes that provide an extra measure of fastening and eliminate swiveling
- Loop design provides maximum cow comfort with:
  - A high cantilever giving more space for the cows' pin bones
  - Open sides and front for easy entrance, exit, and socializing
  - Closed loop that prevents cows for turning around in stalls
  - Sloped top allowing cows to turn sooner and exit easily

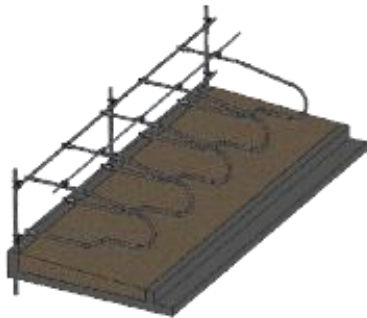

#### WARRANTY

- 2-year pro-rated warranty

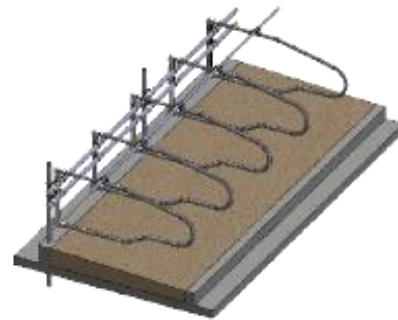

## Freestall Systems

Available in head-to-head or as outside single rows, our Freestall Systems are versatile and adjustable.

### HORIZONTAL SPLIT RAIL MOUNT

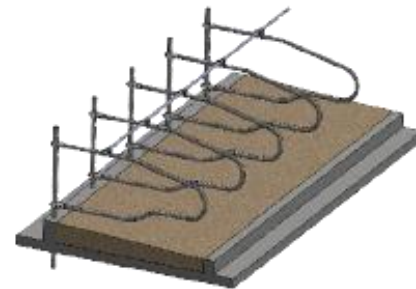

### FLOATING STALL MOUNT
