

Roll Curtain System

Naturally Manage Your Barn's Temperature

When working with Mother Nature to control the environment within your facility, it's important to take control when and where you can.

VES-Artex Curtains allow you to effectively control not only the amount of air you let in and out of your barn, but where, when, and how you let it out

Made from a clear poly material, VES-Artex Curtains provide effective protection against the elements. There are four system configurations to choose from and in combination with an automatic control system provide you with hands-off ventilation management.

BENEFITS

- Barn curtains are an easy, cost-effective improvement that can be added to any facility
- Custom ordered to meet the specific needs of your system
- Corrosion-resistant and feature aluminum roll tubes, roll tube splices, and top support keder strips
- Ensuring a long life, VES-Artex Curtain drums have wire cables that take the stress off the curtain in climbing applications

FEATURES

- Clear poly curtain
- Gear lube is suitable from 140°F to -22°F
- Junction block for convenient connection
- Sealed internal limit switches with back up
- Both power and manual drives are self-braking
- Drive can be fixed or climbing and set in any orientation
- Telescoping arm provides smooth operation and keeps roll tube straight and curtain tight
- High quality aluminum extrusion tube to keep curtain rolling straight

OPTIONS

- Top-opening-down single or double rolling system
- Bottom-opening-up single or double rolling system
- Sizes up to 500'
- Automatic control systems
- Custom Sizing

WARRANTY

- 1-year motor warranty
- 1-year curtain fabric warranty
- 2-year prorated mfg warranty on Lock Drive units and parts (excluding the motor)
