Feedlane Soaking

Effective cooling made easy

A critical component of any cooling strategy, feedlane soaking allows for fast-acting evaporative cooling when combined with supplemental airflow from fans.

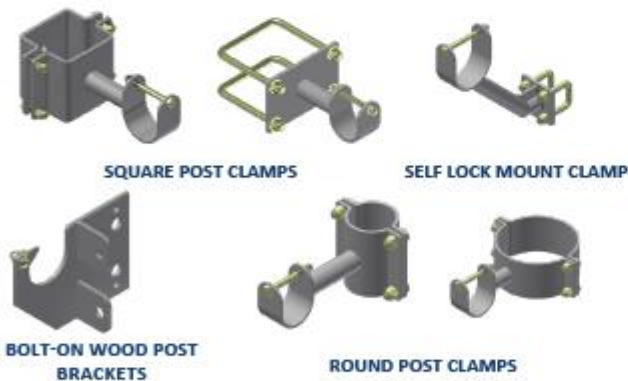

VES-Artex feedlane soaking systems work with environmental controls to automate the system, allowing you to focus on the things that matter.

We recognize that no two facilities are the same, which is why each system is custom designed to meet the specific needs of your facility and management style.

Available VES-Artex Soaking Systems come with:

- » Inlet connector with solenoid, water filter and ball valve
- » Galvanized water pipe with pipe connectors
- » Anti Drip Nozzles spaced every 1.5 m (5') along pipe
- » Soaker pipe mount bracket
- » Environmental controller that adjusts soaking system cycle based on temperature

AVAILABLE IN A VARIETY OF BRACKET STYLES

Soaker pipe comes in 3 different sizes

- » 60mm (2 3/8") OD
- » 73mm (2 7/8") OD
- » 89mm (3") OD

Soaker pipe comes in 3 lengths Ask about other options

- » 6.1m (20')
- » 3.05m (10')
- » 1.52m (5')
