Y2K - MATURE COW

J2K - MATURE JERSEY

H2K - HEIFER YOUNG STOCK

SY2K - MATURE COW

BioRail Freestall Mounting System

The strongest rail mount system on the market

The BioRail has become our most popular freestall system due to its durability, strength, and versatility. This twin rail system features an adjustable design that allows for height and width adjustments after installation, giving you the ability to customize the system depending on the age, breed, and size of the animals in that pen.

This system is ideal for facilities using sand or compost bedding. It keeps all mounts out of bedding, reducing the risk of corrosion. It is also best suited for situations where no or limited concrete is required in the bedding area.

Don't take our word for it. Watch our testimonials video and see what the team at Perry Creek Dairy in Le Mars, Iowa, had to say about it.

[Click to hear how Perry Creek Dairy likes their BioRail](#)

- » No steel mounts in bedding
- » Can mount on building columns
- » Saves on labour and concrete costs
- » Wide variety of clamp and mount options
- » Can be used with all bedding types
