

Sensors

PSS-077-Sensors-01

Create a consistent Animal-Centered Environment

We use a variety of climate sensors in combination with controls, to record and automate changes within your facility. This allows for a more consistent environment where animal well-being is optimized, and productivity is maximized.

BENEFITS

- A more consistent environment
- Hands-Off ventilation system control with the use of environmental controls
- Provide accuracy so you can make the need management changes

FEATURES

- Intuitive user interface
- Easy installation and set up
- Suited for aggressive environments found in dairy industry

OPTIONS

- Temperature
- Static Pressure
- Rain
- Humidity
- Ammonia
- Light

Part#	Description	Cable Length	
		m	ft
Available Sensors			
109159	Sensor, Temperature Probe, 3K	46	150
109160	Sensor, Temperature Probe, 3K	9	30
109161	Sensor, Temperature Probe, 3K	23	75
109170	Sensor, Static Pressure		-
109171	Cable, Temperature Probe Extension, 18-22 AWG	305	1000
109172	Sensor, Temperature Probe with Junction Box	0.3	1
109184	Sensor, Actuator Position	-	-
109232	Sensor, Wind speed Meter (Autoflex)	-	-
109238	Sensor, Rain Presence (Autoflex)	-	-

Sensors

Part #	Description	Cable Length	
		mm	ft
DOL Climate Sensors for Auto Flex Connect			
109181	Sensor, DOL Humidity Probe	1.5	5
109182	Sensor, DOL Temperature/Humidity Probe	1.5	5
109183	Sensor, DOL Light	1.5	5
109187	Sensor, DOL Ammonia	1.5	5
